REISSUE APPLICATION DECLARATION BY THE INVENTOR	Docket Number (Optional) 41145-1001

As a below named inventor, I hereby declare that:

My residence, mailing address and citizenship are stated below next to my name.
I believe I am the original, first and sole inventor (if only one name is listed below) or an original, first and joint inventor (if plural names are listed below) of the subject matter which is described and claimed in patent number 5,916,242, granted June 29, 1999, and for which a reissue patent is sought on the invention entitled Apparatus for Rapid Cooling of the Brain and Method of Performing Same
the specification of which

- is attached hereto.
- was filed on _____ as reissue application number _____ /
and was amended on _____.
(If applicable)

I have reviewed and understand the contents of the above identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

- by reason of a defective specification or drawing.
- by reason of the patentee claiming more or less than he had the right to claim in the patent.
- by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

At least one error in the claims appears in claims 4 and 5 of U.S. Patent No. 5,916,242 as issued, wherein the limitations of claim 5 appear in the claim from which it depends, being claim 4, such that claim 5 is wholly inoperative or invalid. Specifically, the limitations of step a) and of step b) of claim 5 are identical to the limitations of step b) and of step c) of claim 4, respectively. Accordingly, claim 5 of U.S. Patent No. 5,916,242 as issued is inoperative or invalid.

At least one error in the claims further appears in claim 4, wherein the limitations of claim 5 incorporated therein are not required for patentability, such that Applicant has claimed less than patentee had the right to claim in the patent. Specifically, the limitation of claim 4, step b) relating to an "endotracheal tube" is not a required limitation for a patentable method of inducing hypothermia in a patient's brain.
